

Group 3: Signposting and cooperation

Study the NCP Guiding principles for “Signposting and cooperation” described below.

Identify the tasks and elaborate:

- Which tasks are already implemented sufficiently in **Armenia**?
- Which tasks are not implemented sufficiently?
- Which additional measures make especially sense for **Armenia**?
- Identify/draft concrete measures, which would effectively support **Armenian** R&I stakeholders and therefore upgrade the HEU support system (e.g. specific events, training tools, information campaigns, etc.).
- In how far does a cooperation with other stakeholders make sense?
- Summarise and describe your results and present to the whole group (select 1 or 2 people to do so in advance!).

Signposting and cooperation

- a. Signpost to other business support network services those potential participants who require assistance, for example on general EU matters or matters relating to internal market, technology transfer, intellectual property rights (IPR), standardization bodies, or regional development.
- b. Strengthen cooperation between NCPs within the network by promoting joint activities.
- c. Signpost to national/regional funding services and programmes and to Missions, European Partnerships and programme level collaboration among research funders.
